Freysinet Posten (Pty) Ltd

Works period

Start date: July 2007

End date: July 2009

PROJECT DESCRIPTION

Following the award of the Fifa 2010 World Cup to South Africa, a significant number of construction projects were awarded to enable South Africa to host one of the largest sporting tournaments in the World. One of the key aspects of this was the construction or upgrade of a number of soccer stadiums.

FREYSSINET MISSION

Moses Madiba is a modern, state of the art, 63000 seat stadium at which a number of 2010 world cup soccer matches were played. Freysinet Posten supplied and installed the 1F15 system post-tensioning in the seven levels of slabs encircling the pitch.
